Is your company secure?
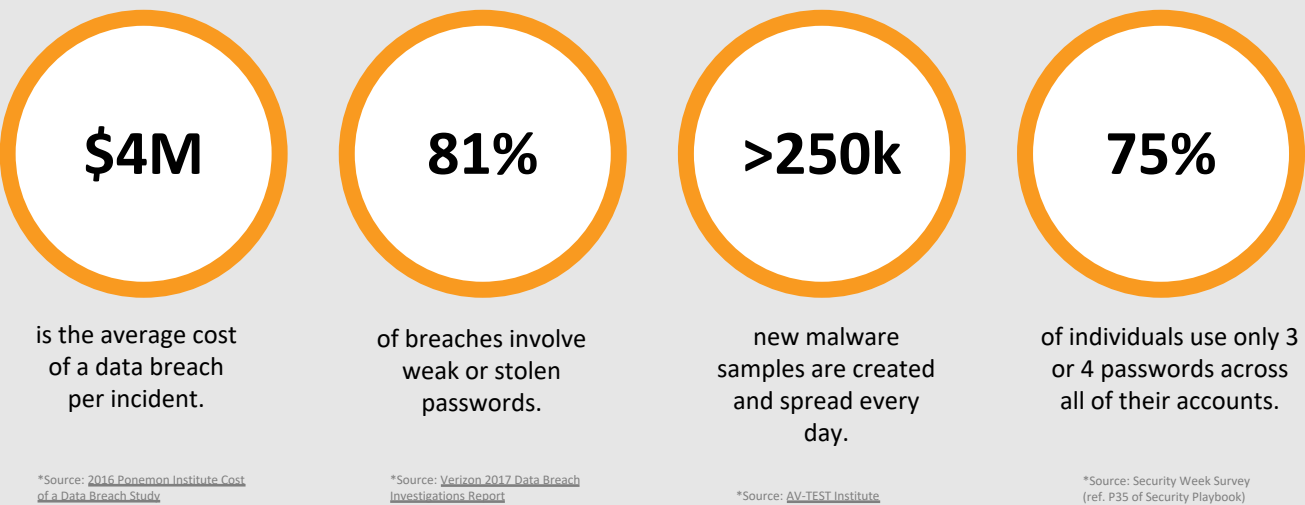

Are you protected from phishing and ransomware, the two most common threat scenarios? Chances are, you may need some help.

Cyberthreats are a material risk to your business.

$4M
is the average cost of a data breach per incident.

*Source: 2016 Ponemon Institute Cost of a Data Breach Study

81%
of breaches involve weak or stolen passwords.

*Source: Verizon 2017 Data Breach Investigations Report

>250k
new malware samples are created and spread every day.

*Source: AV-TEST Institute

75%
of individuals use only 3 or 4 passwords across all of their accounts.

*Source: Security Week Survey (ref. P35 of Security Playbook)

Email

It can take over 7 months to discover a breach and another 80+ days to contain it. Plenty of time to inflict significant damage.

4 Minutes
Email attack launched

1 Source: 2016 Ponemon Institute Cost of a Data Breach Study

229 Days
From breach to detection[1]

311 Days
Damage contained[1]

Know your strengths…and weaknesses

Do you know who is accessing your data?

Can you protect your data on devices, in the cloud, and in transit?

Can you grant access to your data based on risk in real time?

Can you quickly find and react to a breach?

Get secure using Microsoft 365

Identity & Access Management
Protect users' identities and control access to resources

Threat Protection
Protect against threats and recover quickly when attacked

Information Protection
Confirm documents and emails are seen only by authorized people

Security Management
Gain visibility and control over security tools

Microsoft 365 Advanced Threat Protection (ATP)

Office 365 ATP
Protects your email, files, and Office 365 apps against attack vectors.

>99.9%
Malware catch rate

45 Seconds
Average file detonation time

Azure ATP
Helps protect hybrid enterprise environments from advanced targeted cyber attacks and insider threats.

Windows Defender ATP
Provides preventative protection, detects attacks and zero-day exploits, and gives you centralized management for your end-to-end security lifecycle.

We can help

Education and Assessment
We can evaluate your security position, identify gaps, and create a roadmap to increased protection and security.

Proof of Concept
Understand how the security features in Microsoft 365 can be used within your specific environment and prioritize the implementation of key features based on your needs.

Ongoing Security Services
Need ongoing security support? No problem! We've got you covered to help you maintain and reinforce security and protection.

Contact us for a security assessment and to learn more.
